Projects & Technical Leadership

Centauro Engenharia

Rio de Janeiro, Brazil

Web Projects Technical Lead

- **New Commercial Website:** Responsible for the complete end-to-end development cycle, from selecting the technology stack (Next.js, React) and configuring the hosting environment to deployment, API integration, and ongoing maintenance.
- **Legacy Portal:** Led the overall refactoring of the corporate system (PHP and JavaScript), collaborating closely with management to gather requirements and implement improvements.

Experience

Centauro Engenharia

Rio de Janeiro, Brazil

Network Administrator (Internal IT Lead)

Jun 2026 - Present

- Technical and operational leadership of the internal IT team, acting as the main decision-maker regarding software architecture, infrastructure, and the adoption of new technologies.
- Led the modernization and complete refactoring project of a legacy corporate portal built with **pure PHP**, architecting structural improvements and implementing new features without the use of pre-existing frameworks.
- Evaluation, planning, and continuous implementation of systemic improvements, integrating software development with the stability and security of the company's networks and servers.

Centauro Engenharia

Rio de Janeiro, Brazil

IT Assistant

Apr 2026 - May 2026

- Development and launch of the new commercial website using **Next.js, React, TypeScript, and Tailwind CSS**, integrating the **Resend API**.
- Manipulation and structuring of relational databases (**MySQL**), focusing on query optimization for internal systems.
- Organized and distributed team tasks applying **Scrum and Agile Methodologies**, using integrations and automations created for **Microsoft Planner and Teams**.

Centauro Engenharia

Rio de Janeiro, Brazil

IT / Development Intern

Jun 2025 - Mar 2026

- Maintenance and evolution of a legacy portal developed in **pure PHP and JavaScript**, ensuring the operational stability of a critical corporate system.
- Creation and styling of responsive web interfaces using **HTML5 and CSS3**, aligned with project usability requirements.
- Executed queries, updates, and data manipulation directly in a **SQL** environment.
- Provided specialized technical support focused on identifying and resolving software bugs from L1 to L3.

Skills

- **Technical:** React, Next.js, JavaScript (ES6+), TypeScript, Node.js, Python, PHP, PostgreSQL, MySQL, SQL, Git/GitHub, RESTful APIs Integration and Consumption.
- **Processes:** Agile Methodologies (Scrum), Task Management, Workflow Automation.
- **Languages:** Portuguese (Native), English (B2 - Upper Intermediate).

Education

Instituto Brasileiro de Medicina de Reabilitação (IBMR)

Rio de Janeiro, Brazil

Bachelor's Degree in Computer Science

Jan 2022 - Dec 2025
